Vivarium

Operations and
animal procedures

Services for vivarium&laboratory

Laminar cabinets service

Autoclave services

Service of CO2 incubators

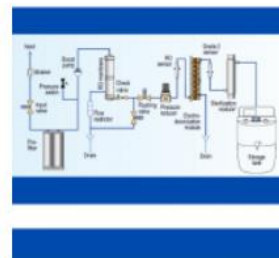

Service and inspection of washers

Service and calibration of IVC from Tecniplast, Allentown, Ehret, Zoonlab

Integrity measurements of HEPA and ULPA filters, DOP tests

Configuration of water purification systems in the laboratory

Qualified, experiences, international service team

General services

- replacement of wearing parts in accordance with the manufacturer's specifications
- Replacement HEPA / ULPA filter as well other filters
- checking the condition of the seals
- verification of electronic components work
- check/ validation certification

In Croatia and Slovenia – cooperation with regional service partners

Vivarium and laboratory services

IVC systems

- replacement of HEPA filters
- Integrity measurements – DEHS tests

Washers

- analysis of error messages
- adjustment of dosing pumps
- cleaning spray nozzles in the washing chambers

Configuration of water purification systems in the laboratory

- calculation of water demand in the laboratory, vivarium
- choosing proper pumps and purification equipment
- preparing the project and installation system, postguarantee service

CO₂ incubators

- temperature distribution
- CO₂ concentration test

Laminar chambers

- laminar flow velocity test
- main and exhaust filter integrity test

Autoclaves

- temperature distribution test and pressure
- pressure test and service assistance during device acceptance by the Office of Technical Inspection
